

### **TANCET 2010 Analysis**

TANCET 2010 Exam was conducted on 29<sup>th</sup> May. There was total number of 100 questions asked across 5 sections. Each section had 20 questions. Each correct question carried 1 mark and each incorrect question carried (-1/5) mark.

#### **Section 1: Business Situation**

This section had 2 case studies each having 10 questions. Both the case studies content wise were easy. But the questions were not straightforward.

#### **Section 2: Reading comprehension**

This section had 2 RC passages each having 10 questions. One was on Water pollution and the second one was on Consumers (more into commerce). Both the RC passages were straightforward with only 3 or 4 questions on Inference, everything else were direct data base questions.

#### **Section 3: Quantitative Ability**

This section had direct application based questions. There were 5 questions on Numbers, 9 questions on Arithmetic and 6 questions on Geometry.

#### **Section 4: Data Sufficiency**

This section was toughest among all sections. Depth knowledge of mathematics was required. There were 6 questions on numbers, 6 questions on Arithmetic, 7 questions on Geometry and 1 question on Modern Mathematics.

#### **Section 5: English Usage**

The Questions were based on finding the error in the sentence given which is broken into 4 parts. The toughness level was mediocre with few questions direct.

Overall the paper was of medium difficulty and a score of 45 – 50 marks was easily attainable.
