

## Smart DI Cracker

Data Interpretation involves using the statistics that studies and surveys provide to make concrete observations. These observations are, in turn, used as the basis for decision-making and policy formulation, performance analysis, and identification of relevant information hidden in the mass of the statistics. Since being comfortable with large chunks of information is one of the prerequisites for MBA aspirants, Data Interpretation forms a significant part of almost all entrance examinations.

Smart Data Interpretation Cracker (SDIC) is a tailor-made product for students who want to imbibe the ins and outs of Data Interpretation and become adept at applying shortcuts and using options to arrive at answers quickly. The module teaches methods of attempting questions while at the same time giving the student a rerun through key concepts. In addition to the conventional methods, students will learn how to crack questions with aptitude. It helps a student to improve his speed and, consequently, his performance across various management entrance exams such as CAT, XAT, IIFT, CMAT, SNAP, NMAT etc.

SDIC consists of 33 sessions which capture the teachings of prominent experts of the field of aptitude testing. Each virtual class has an eclectic mix of 4-6 questions culled from past iterations of management entrance exams, as well as questions made from scratch by our own in-house experts and content team. The meticulously selected questions in these modules give a flavour of actual exam questions and cover topics like tables, bar graphs, pie charts, line charts and various combinations of different kinds of graphs.

The sessions have been planned in such a way so as to cater to the specific requirements of students seeking to improve their existent knowledge even when under severe time constraints. Those who are taking another attempt at MBA entrance exams to improve upon their past performances will also benefit tremendously from these classes and post-exercises. A student can review the session any number of times and at any time suitable to him. The sessions have to be taken within a time frame to ensure discipline. These students generally would not want to waste their time in traveling and attending a large number of sessions, which cover those fundamentals that are already known to them.

To reinforce the concepts you have just learned, we have supplied post-lesson exercises to give you ample practice for similar kinds of questions. It is essential to go through each of the questions in the post-exercises diligently so that you identify which concepts you need to revise. Having tested your learning, revisit the session and cement your concepts.

### **Panel of Experts**

**GP:**

An alumnus of IIM Bangalore, GP is India's first and finest aptitude guru. A co-founder at Career Launcher, he has coached and guided scores of students towards their cherished goal of making it to top B-Schools in the country.

**Niraj:**

An alumnus of FMS, University of Delhi and a former manager at ITC Ltd., Niraj has cracked CAT and received IIM calls an incredible 14 times!!!! An exam taker sans comparison, he also secured 5th rank in CMAT 2013-14 (First Test).

**Gejo:** An alumnus of IIT Madras and IIM Calcutta, Gejo is an MBA super guru in his own right. Passionate about mentoring, Gejo is an acknowledged education industry expert with specialties extending from vocational training to branding and marketing of educational services and products.

## Session Plan

| S.No. | Topic            | Session                | No. of classes | Faculty |
|-------|------------------|------------------------|----------------|---------|
| 1     | Get comfortable  | Intro to CAT           | 3              | GP      |
| 2     | Get comfortable  | Non-negotiable         | 1              | GP      |
| 3     | Get comfortable  | Calculate smart        | 4              | GP      |
| 4     | Smart DI Cracker | Tables                 | 3              | GP      |
| 5     | Smart DI Cracker | Line Chart             | 3              | GP      |
| 6     | Smart DI Cracker | Bar Graph              | 3              | GP      |
| 7     | Smart DI Cracker | Pie Chart              | 6              | GP      |
| 8     | Smart DI Cracker | Caselet based problems | 2              | Gejo    |
| 9     | Smart DI Cracker | Combination Graphs     | 3              | GP      |
| 10    | Smart DI Cracker | Games & Tournaments    | 3              | Gejo    |
| 11*   | Smart DI Cracker | Data Sufficiency       | 2              | Niraj   |
